

AEROTENTS

Aerotents, an innovative addition to EPS-Doublet's lineup of tents and canopies, offer the ideal brandable solution for any environment, indoors or out. Aerotents may be completely customized with both brilliant full-color digital printing as well as the addition of several unique accessories, including zip-in walls, visors, tunnels and even internal LED lighting in the legs. Unlike traditional "inflatable" tents, Aerotents need only be filled during the initial install and do not require the operation of a continuous blower, allowing for silence and use in indoor applications. Further, Aerotents have one of the highest wind ratings in the market, withstanding gusts of 40 mph or greater, making them ideal for mountain top marketing activations.

AEROTENT 13

Four arches. Optional visors and zip-in walls are also available.

13' x 13'

AEROTENT 16

Four arches. Optional visors and zip-in walls are also available.

16' x 16'
