

BARRICADES AND CROWD CONTROL

Whether you require an affordable single-day solution, or a reliable investment for long-term use, EPS-Doublet has a variety of barrier and crowd control options to suit every application and budget. We offer both rental and purchase options on barricades, and a wide range of color, printing and durability alternatives within our printed fencing line.

SECURISTAR

EPS-Doublet's Securistar barricades offer safe, secure and durable crowd control. The unique design of our barricades overcomes the toughest terrain challenges with secure linkage and leveling, preventing damage and unwanted disassembly by a crowd. Storage and transportation costs are also reduced thanks to the innovative square stacking capability. Securistar steel barricades are ideal for festivals and fairs, concerts and events, traffic flow and security check points, and are a favorite of law enforcement agencies across the country.

87" X 41"

ELITE SLANTED

The patent-pending Elite Slanted steel barricades provide both excellent crowd control as well as a truly unique aesthetic and strong promotional potential. The innovative slant allows for enhanced visibility of event and sponsor identities, and also serves as an exceptional excitement-building opportunity. The premium rigid substrates used to cover the barricades make for an extremely durable (and noisy) vehicle on which crowds may pound in their anticipation of approaching racers or stage-bound acts. Elite Slanted barricades are constructed of steel, powder coated in white, and are available for both barricade rental or purchase, depending on quantity.

BARRICADE COVERS

Whether you require an affordable single-day solution, or a reliable investment for long-term use, EPS-Doublet has a variety of barrier and crowd control options to suit every application and budget. We offer both rental and purchase options on barricades, and a wide range of color, printing and durability alternatives within our printed fencing line.

BANNERS

Economical and durable, roll banners are available in screen printed polyethylene, corona cloth and dye printed or non-woven polyester. Individual banners may also be attached to barricades to offer promotional opportunities and sponsorship visibility. See Vinyl Banners for more information. Not available for Elite Slanted barricades.

COVERS

Don't miss out on additional branding opportunities for your event or event sponsors. EPS-Doublet offers full color printed graphics on custom steel barricade covers – ideal for use with our line of Securistar steel barricades. Covers provide a dual sided promotional display, and are designed to accommodate the linking mechanisms at each end of the barricade. Not available for Elite Slanted barricades.

RIGID SIGNAGE

Certain long-term applications call for more rigid signage options. We print on a variety of substrates designed to create a more permanent message. Establish boundaries and ensure that your promotional message withstands the effects of weather and spectator enthusiasm.
