

DISPLAY SYSTEMS

EPS-Doublet's line of display systems provides the highest level of flexibility and versatility, enabling the ideal menu or retail display solution for any specification or application.

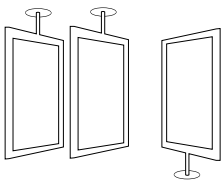

DIMENSIONS = STAND WIDTH X GRAPHIC HEIGHT

PERFEX™

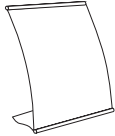

Great at motivating additional purchases, point-of-purchase signs can be among your best sign and graphics investments. Two distinct profiles available: the Curvilinear in silver and Rectilinear in matte black. An innovative connection system enables most any configuration – simply snap together for exceptionally easy assembly. For use in hanging, wall mounted, tabletop or floor stand applications.

ANOFRAME™

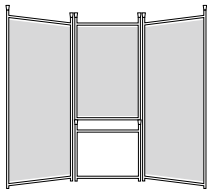

The AnoFrame may be tilted to offer optimal display to almost any viewing position. Available with a variety of bases, AnoFrame's swivel mount gives you complete freedom to mount your signage display anywhere and from any angle, while the Versa Mount with ceiling anchors offers an ideal behind-counter display solution. Available in champagne, black and silver. Frames are custom cut to exact graphic dimensions.

ECLIPSE

A simple and elegant sign holder. Tabletop or Wall mounted version available. The Eclipse is great for food service, hospitality, product identification, prices, instructions, promotional messages, retail signage and more. Available in satin silver or matte black. Includes matte protective lens. Wall mounted version includes mounting hardware.

CREO

Creo is an innovative visual merchandising exhibit system featuring tool-free assembly, modularity and heavy-load capability. Creo does not have a lot of components, but because of its extraordinary design, it is able to be configured in a remarkably large number of ways. Designed to support trade show expositions and other mobile marketing opportunities, Creo has proven to be an excellent value for point-of-sale promotions as well. Call for finish and customization options.
