

SIDEWALK SIGNAGE

Offering greater permanence and stability than traditional a-frame signage, our curbside display stands provide visual impact in high traffic pedestrian areas, with the ideal balance of aesthetic appeal and weather-proof construction.

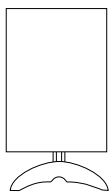

WINDMASTER

A completely enclosed top provides maximum moisture resistance. The two side rails open to load and unload posters. The top and bottom rails are stationary and cannot be kicked out of place. Choice of two styles: easy snap-on legs or molded water/sand filled base with built in wheels that tilt and roll for easy moving.

28" x 44"

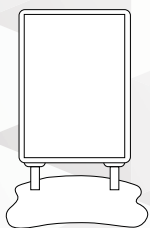

ROCKET

The Rocket is ideal for sidewalk advertising. The base can be filled with water for stability and the spring loaded graphic support provides the flexibility needed to handle the challenge of outdoor elements. Recommended materials include coroplast for outdoor usage and foamboard for indoor usage.

24" x 36"

WHIRLWIND

A double-sided outdoor signboard, the Whirlwind features tool-free assembly and rugged aluminum and powder-coated steel construction. The dual spring design flexes to help withstand wind gusts. The hollow base can be filled with water or sand for extra stability and has wheels for easy installation and removal.
